INTRODUCTION

The material provided in this e-book is a step-by-step guide for creating a website with XSitePro 2.5.

These step-by-step instructions will demonstrate how easy it is to create a website with XSitePro 2.5. Also, I will provide images so that you can see the step-by-step instructions.

You can preview XSitePro 2.5 by clicking on the following link - <u>How To Create A</u> <u>Website With XSitePro 2.5.</u>

How To Create A Website With XSitePro 2.5

1. Open XSitePro 2.5 and click on Add Project

XSite Pro - Project Selection Tree

CONCLUSION

Creating a website with XSitePro 2.5 is quite easy. Of course, as you build your website, you will need to spend more time on it. However, the time you spend will be on adding content. The design work is done for you automatically.

You can preview XSitePro 2.5 by clicking on the following link - <u>How To Create A</u> <u>Website With XSitePro 2.5.</u>
